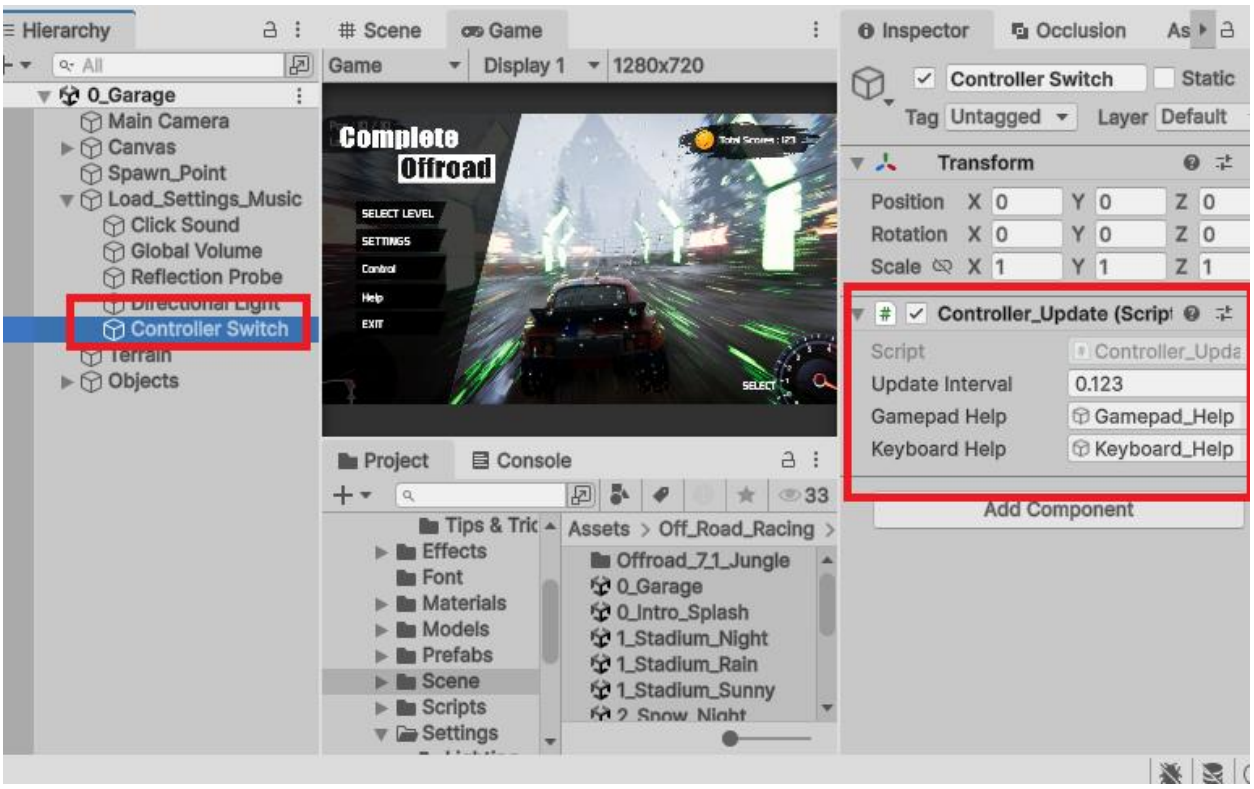
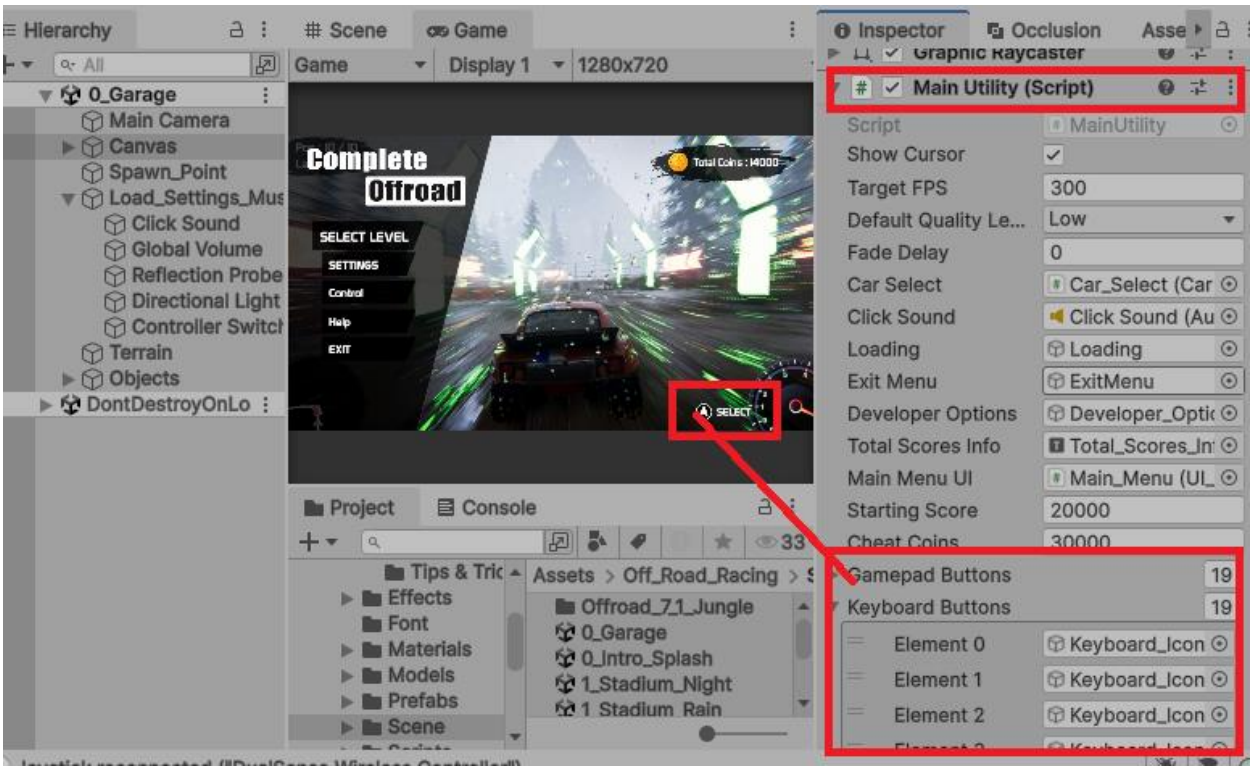
Input System

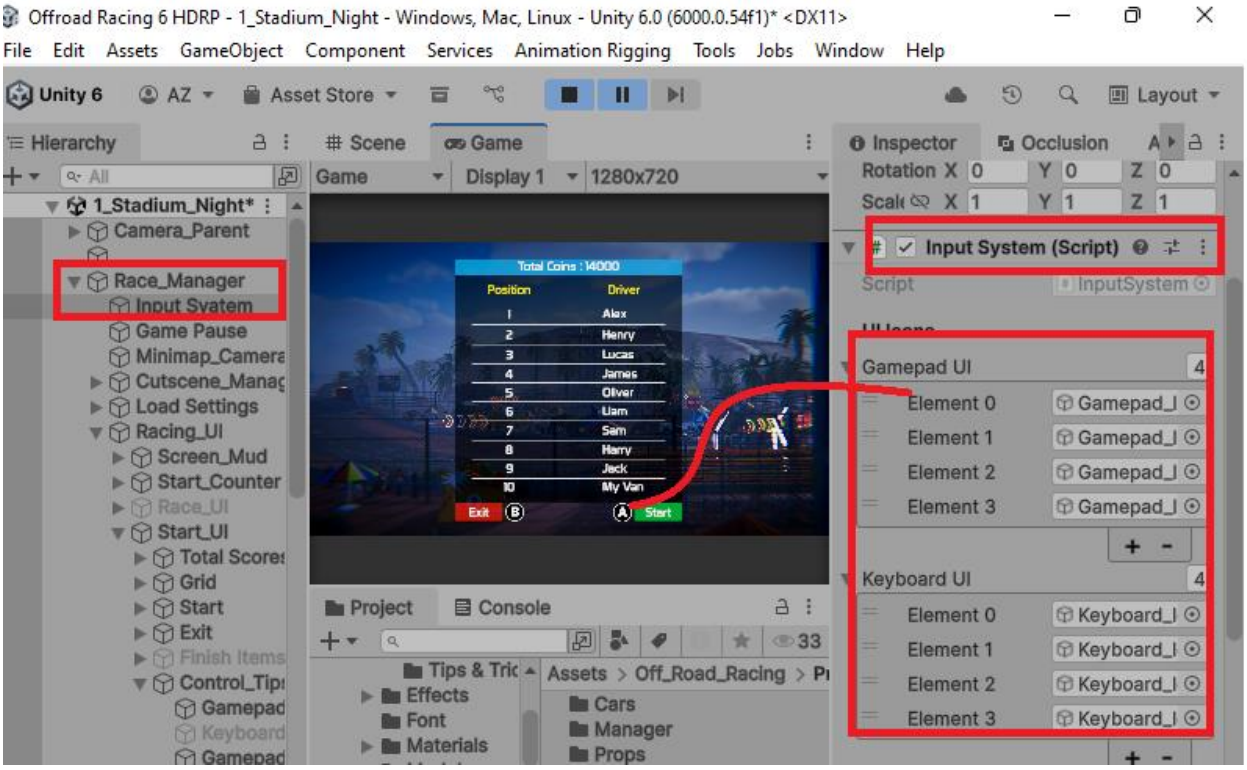
In this game, the control mode automatically switches between keyboard and gamepad. When the gamepad is connected, the game control switches to gamepad mode, and when the gamepad is not connected, it automatically switches to keyboard mode

You can check the **Controller_Update** script:



When you add a new button to your UI, you must add its icon to the **Main Utility** component:





In the **Race_Manager** you need to add into the **Input_System** component:
